

SHARING THE ENERGY OF KNOWLEDGE

Expand your network and knowledge

Energy Delta Institute (EDI) is an international energy business school. Through a rich variety of energy education programmes and networking activities we prepare energy professionals for the challenges they face in what is a dynamic environment.

Our partner network

EDI works closely with internationally renowned business and knowledge partners to develop high quality joint excellence programmes. Combining the experience and knowledge of our international partner network, we aim, among other things, to achieve the extension of natural-gas-related topics covered in our programmes to include renewables, leadership and energy transition.

Benefits of EDI

For EDI partners:

- An invitation to the exclusive International Partner Meeting
- Two free passes for an EDI event
- A position in the Educational Advisory Board of one (or more) of EDI's programmes
- Access to a large international network
- A brand platform through the hosting of courses, events, site visits or the supplying of lecturers
- One free Partner Event (more than fifteen participants) or In-house training (maximum of fifteen participants)
- Discount on EDI training programmes

For EDI participants:

- Balance between practical business experience and academic knowledge
- Life-long learning: Our portfolio includes introductory, specific and master programmes
- Blended learning: combining classroom training with inspiring E-learning content
- Network events: opportunity to gain deeper insights and expand EDI participants' network

Founding partners

Sharing the Energy of Knowledge.

EDI's networking activities

Developments within the energy industry are constantly changing the landscape of our future energy supply. At EDI we believe that in order to keep pace with the latest developments, energy sector stakeholders need to share their insights to promote discussion, inspire one another and broaden their network. It is for these reasons that we organise the following annual events:

- **International Supervisory Board & International Partner Meeting**

These meetings take place annually in order for us to discuss and justify the strategy and developments of Energy Delta Institute (EDI). Representatives of the founding partners, business and knowledge partners and the board members of EDI are present during these events.

- **Eurasia Dialogue**

During this event, EDI connects businesses, academics and research institutions from West European and Russian oil and gas sectors, so they can exchange their knowledge and experiences on the most highly-debated topics within the energy industry. It is organised by EDI and Institute of World Economy and International Relations (IMEMO).

- **Energy Youth Event**

This is a unique informational event intended to bring together representatives of the industry's business elite and best students from the leading energy companies and partner universities of EDI. During this event, participants are given an opportunity to identify new developments within the energy industry and discover career opportunities. It is organised among others by Gazprom, Higher Economic School of the Saint-Petersburg State University of Economics and Energy Delta Institute.

About Energy Delta Institute

Energy Delta Institute (EDI) is an international energy business school. Through a rich variety of energy training courses and networking activities we prepare energy professionals for challenges they face in what is a dynamic environment. EDI was founded in 2002 by GasTerra BV, NV. Nederlandse Gasunie, PJSC Gazprom, Shell and the University of Groningen, later joined by Enagás. The energy community has come to appreciate EDI as a platform on which both partners and participants can exchange energy knowledge. The changing energy world is forcing companies to innovate in order to stay competitive. In addition, the energy sector faces the possibility of a growing shortage of qualified personnel over the coming decades. The sector has only one choice: to invest in knowledge.

Our energy training programmes and events respond to this urgent need, focusing on the economic, management, legal and geopolitical aspects of the energy business. All dates, locations and prices may be subject to change.
