

# International Gas Value Chain Programme

Discover the dynamics of gas, explore the future

5-8 October 2020

Athens, Greece

English

4 days

All levels

€ 3.950,-

Open market

## Topics

- Characteristics and dynamics of natural gas business from exploration and production to transmission, distribution and storage
- Technical and commercial dynamics of LNG industry
- EU energy policies and impact on gas markets
- Gas pricing and contracting
- Natural gas portfolio management and trading
- New business models
- Global gas market outlook
- Role of gas in renewable energy generation

## About the programme

This four-day course given by a highly experienced business professional, specialised economist and author, Andrej Pustisek, takes you on a tour of all the key processes and dynamics of the gas value chain. It looks at the roles of the various stakeholders, analyses international commercialisation strategies, and dives into the impacts of EU energy and climate policies on gas markets.

\*It includes an online preparatory course of one hour per week starting one month before the "live" course.

# International Gas Value Chain

## What's in it for me?

Upon completion of this programme, the participants will be able to:

- Identify key aspects of gas exploration, production, transmission and commercialisation
- Understand current energy market dynamics and their implications for the future
- Recognise evolving business models for pipeline gas and LNG
- Assess role of gas in low-carbon economy
- Identify risks and new opportunities in gas
- Acquire an international network of peers with similar interests

Comprehensive overview of gas markets

Perspective on future challenges and opportunities

Acquire international network of peers and experts in gas

## For who?

For professionals who are relatively new to the gas business and want to acquire a comprehensive overview of how gas markets actually work:

- Young professionals new to the gas industry
- Specialists (e.g. traders, business developers) who want to get an integrated view of the gas business
- Mid-career to senior-level professionals new to the gas industry
- Technical and/or operational staff moving into commercial roles

## Certification

Participants of the International Gas Value Chain Programme will receive a certificate on behalf of Energy Delta Institute. This Programme will contribute to your continuing professional development.

## Investment

€ 3.950,- (Accommodation costs and VAT excluded)

**ENERGY  
DELTA  
INSTITUTE**  
*Energy Business School*

Energy Delta Institute (EDI) is an international energy business school. Our mission is to bring together world-class knowledge and business skills to educate and inspire energy professionals, so that they can become the new leaders of a sustainable energy future. The changing energy world is forcing companies to innovate in order to stay competitive. Through a rich variety of energy training courses and networking activities we prepare energy professionals for challenges they face in this dynamic environment. The energy community has come to appreciate EDI as a platform on which both partners and participants can exchange energy knowledge. In addition, the energy sector faces the possibility of a growing shortage of qualified personnel over the coming decades. The sector has only one choice: to invest in knowledge. EDI was founded in 2002 by Gasunie, Gastera, Gazprom and the University of Groningen, and was later joined by Enagás and Shell.
