

Masterclass Carbon Capture, Utilisation and Storage

Latest developments around a key instrument in the Dutch Climate Agreement

25 - 26 June 2020

Mongstad, Norway

English

1 day

All professional levels

€ 600,-

Open market

Topics

- The CCUS value chain
- The role of CCUS in the energy transition
- Ways of capturing, storing and transporting CO₂
- Applications of CO₂
- European and Dutch CCS landscape
- Legal aspects, outlooks and economics

About the programme

The Masterclass CCUS offers a unique overview of all currently available technologies for capturing, transporting, storing and utilising CO₂. It also discusses the most relevant economic parameters, the regulatory framework and a number of innovative new projects, and includes a business case in which all topics come together.

Masterclass CCUS

What's in it for me?

Upon completion of this Masterclass, the participants will be able to:

- Get a comprehensive understanding of the CCUS value chain
- Get an overview of the dynamic Dutch CCUS landscape
- Identify new opportunities in the sector
- Receive the latest updates on the most promising CCUS projects

Network with experts and peers

Key energy transition topic

Lecturers with practical experience

Participants of the Masterclass CCUS will receive a certificate on behalf of Energy Delta Institute. This Programme will contribute to your continuing professional development.

Investment

€ 600,- (Accommodation costs and VAT excluded)

**ENERGY
DELTA
INSTITUTE**

Energy Business School

Energy Delta Institute (EDI) is an international energy business school. Our mission is to bring together world-class knowledge and business skills to educate and inspire energy professionals, so that they can become the new leaders of a sustainable energy future. The changing energy world is forcing companies to innovate in order to stay competitive. Through a rich variety of energy training courses and networking activities we prepare energy professionals for challenges they face in this dynamic environment. The energy community has come to appreciate EDI as a platform on which both partners and participants can exchange energy knowledge. In addition, the energy sector faces the possibility of a growing shortage of qualified personnel over the coming decades. The sector has only one choice: to invest in knowledge. EDI was founded in 2002 by Gasunie, Gastera, Gazprom and the University of Groningen, and was later joined by Enagás and Shell.
