- Project governance

About the programme

In this 4-day programme led by experienced project managers you learn how to carry out large international energy projects, both in renewables and fossil fuels.

The course, which pays special attention to the increasing interconnectedness in global energy systems, covers the entire project management process from project finance and scoping and planning to execution and realisation.

Executive Programme Large Energy Projects - Investment and Realisation

What's in it for me?

Upon completion of this programme, the participants will be able to:

- Get a helicopter view of what is involved in large energy projects
- Acquire basic insight into all the different aspects of complex projects
- Acquire the tools needed to direct, manage and assess complex projects from start to finish
- Ask the right questions from project managers, suppliers and operators

Strong focus on practice

Latest project management techniques

Identify new opportunities

For who?

This programme is intended for middle and higher management executives in the energy sector involved in large midstream and downstream projects. It is also very useful for managers or professionals who are involved in overseeing or supporting such projects.

Certification

Participants of the Executive Programme Large Energy Projects - Investment and Realisation will receive a certificate on behalf of Energy Delta Institute. This Programme will contribute to your continuing professional development.

Investment

€ 3.950,- (Accommodation costs and VAT excluded)

**ENERGY
DELTA
INSTITUTE**
Energy Business School

Energy Delta Institute (EDI) is an international energy business school. Our mission is to bring together world-class knowledge and business skills to educate and inspire energy professionals, so that they can become the new leaders of a sustainable energy future. The changing energy world is forcing companies to innovate in order to stay competitive. Through a rich variety of energy training courses and networking activities we prepare energy professionals for challenges they face in this dynamic environment. The energy community has come to appreciate EDI as a platform on which both partners and participants can exchange energy knowledge. In addition, the energy sector faces the possibility of a growing shortage of qualified personnel over the coming decades. The sector has only one choice: to invest in knowledge. EDI was founded in 2002 by Gasunie, Gastera, Gazprom and the University of Groningen, and was later joined by Enagás and Shell.
