

European Energy Markets Programme

Get up to speed on European Energy Markets and the impact of the energy transition

11 -14 May 2020

Vienna, Austria

English

4 days

Young professionals/
mid career;

€ 3200,-

Open market

Topics

- Existing and future political, regulatory and geopolitical frameworks of European energy markets
- Impact of new developments (in renewables, storage, smart grids, green gas, hydrogen, etc.) on the energy sector and incumbent market players
- Increasing integration of electricity, transport and heating sectors
- How will future smart and sustainable cities look like

About the programme

This intensive four-day course will give you a complete overview of how European energy markets work and how they are expected to be transformed by the transition to a zero-emission energy system. It is a must for anyone who wants to gain a critical understanding of this hugely important and complex development that will affect us all.

European Energy Markets

What's in it for me?

Upon completion of this programme, the participants will be able to:

- Understand supply and demand dynamics in EU gas, heat and electricity markets
- Understand (geo-)political and regulatory frameworks of European energy markets
- Anticipate challenges and opportunities of energy transition and sustainable cities of the future
- Assess the future of a single integrated EU energy market

Acquire strategic perspective on European energy transition

Anticipate challenges and opportunities

Meet with peers and experts

For who?

This programme is designed for participants that are, or become, active in the energy sector and/or different institutions related to the energy industry, and want to get acquainted with the energy transition:

- Professionals in the European energy markets
- Consultants/advisors working in the European energy industry
- Project coordinators, strategy advisors in the energy sector
- Industry professionals who need to assess the impact of the energy transition on their business fields
- Regulatory affairs and relations officers/managers at governmental, provincial or municipal bodies
- Consultants and analysts

Certification

Participants of the European Energy Markets Programme will receive a certificate on behalf of Energy Delta Institute. This Programme will contribute to your continuing professional development.

Investment

€ 3.200,- (Accommodation costs and VAT excluded)

**ENERGY
DELTA
INSTITUTE**
Energy Business School

Energy Delta Institute (EDI) is an international energy business school. Our mission is to bring together world-class knowledge and business skills to educate and inspire energy professionals, so that they can become the new leaders of a sustainable energy future. The changing energy world is forcing companies to innovate in order to stay competitive. Through a rich variety of energy training courses and networking activities we prepare energy professionals for challenges they face in this dynamic environment. The energy community has come to appreciate EDI as a platform on which both partners and participants can exchange energy knowledge. In addition, the energy sector faces the possibility of a growing shortage of qualified personnel over the coming decades. The sector has only one choice: to invest in knowledge. EDI was founded in 2002 by Gasunie, Gastera, Gazprom and the University of Groningen, and was later joined by Enagás and Shell.
