

Executive Programme Energy Transition and Innovation

Get ready for the future of energy – with Nyenrode Business University, RWTH Aachen
University of Technology and the International Energy Agency

23-26 March 2020
25-27 May 2020

Module 1: Nyenrode, The Netherlands
Module 2: Paris, France

English

4+3 days

Executive level

€ 5.950,-

Open market

Topics

Module 1:

- Technological developments and implications for the energy business
- Innovation dynamics: how to respond to today's disruptive changes
- The role of gas in the worldwide energy transition
- Digital transformations in the power sector

Module 2:

- Views of the International Energy Agency on energy trends and investments
- Latest insights from the International Panel on Climate Change
- The role of major energy companies in the energy transition
- Presentations and discussion of participants' 'Innovation Essays'

About the programme

In this advanced two-module programme a team of expert lecturers from universities, global institutions and leading energy companies will acquaint you with the latest innovations and insights into the international energy transition.

You will take a deep dive into key aspects of the energy transition, including innovation dynamics, innovations in business models, the impact of digitalisation and technological innovation on the energy sector, and the roles of key stakeholders (major energy companies, policymakers, investors, researchers).

Executive Programme Energy Transition and Innovation

What's in it for me?

Upon completion of this programme, the participants will be able to:

- Identify key challenges facing the energy sector
- Understand the roles of gas, renewables and other forms of energy in the global energy mix
- Distinguish main trends
- Analyse the role of innovation in the energy sector on the basis of case studies
- Write an "energy innovation essay" in which you develop your own perspective on the energy transition

Identify and assess new business models in the energy sector

First-hand knowledge from experts in the field

Understand elements and steps of scenario planning

For who?

This programme is for professionals with considerable knowledge of the energy sector, in particular mid and senior level positions from diverse and multidisciplinary departments in companies and organisations. For example:

- Business development managers
- Strategy consultants/managers
- Operational, portfolio and risk managers
- Marketing and performance consultants/managers
- Innovation, research and business development advisors
- Energy business and policy analysts

Certification

Participants of the Executive Programme Energy Transition will receive a certificate on behalf of Energy Delta Institute. This Programme will contribute to your continuing professional development.

Investment

€ 5.950,- (Accommodation costs and VAT excluded)

**ENERGY
DELTA
INSTITUTE**
Energy Business School

Energy Delta Institute (EDI) is an international energy business school. Our mission is to bring together world-class knowledge and business skills to educate and inspire energy professionals, so that they can become the new leaders of a sustainable energy future. The changing energy world is forcing companies to innovate in order to stay competitive. Through a rich variety of energy training courses and networking activities we prepare energy professionals for challenges they face in this dynamic environment. The energy community has come to appreciate EDI as a platform on which both partners and participants can exchange energy knowledge. In addition, the energy sector faces the possibility of a growing shortage of qualified personnel over the coming decades. The sector has only one choice: to invest in knowledge. EDI was founded in 2002 by Gasunie, Gastera, Gazprom and the University of Groningen, and was later joined by Enagás and Shell.
