

Intensive Course Hydrogen

Discover the new world of hydrogen – get the facts behind the hype

Session 1: 22 - 24 April
Session 2: 7 - 9 October

Hamburg, Germany
Spain

English

3 days

All levels

€ 2.950,-

Open market

Topics

- Why hydrogen has become a hot topic
- Production of hydrogen and methods of storage, transport and flexibility
- Safety and handling
- Potential roles of hydrogen in low-carbon zero-emission energy system
- Economics and pathways to scale-up
- Latest policies and legislative initiatives

About the programme

In this three-day intensive course, held in Hamburg, Germany, you will get a complete overview of the hydrogen value chain and learn all about the latest developments. The course is given by recognised hydrogen experts from business and academia.

Intensive Course Hydrogen

What's in it for me?

Upon completion of this course, the participants will be able to:

- Acquire strategic insight into important building block of future energy system
- Get the real facts behind the hydrogen hype
- Understand how hydrogen works in power generation, energy storage, heating, industry and mobility
- Identify new opportunities for the coming decades
- Interact with experts and peers

Identify new opportunities of the hydrogen economy

Connect with experts and peers

Learn from top hydrogen specialists

For who?

The Intensive Course Hydrogen is highly recommended for professionals in and outside the energy sector who need to get an overview of the entire hydrogen value chain and want to know more about the possibilities hydrogen has to offer.

Certification

Participants of the Intensive Course Hydrogen will receive a certificate on behalf of Energy Delta Institute. This course will contribute to your continuing professional development.

Investment

€ 2.950,- (Accommodation costs and VAT excluded)

**ENERGY
DELTA
INSTITUTE**

Energy Business School

Energy Delta Institute (EDI) is an international energy business school. Our mission is to bring together world-class knowledge and business skills to educate and inspire energy professionals, so that they can become the new leaders of a sustainable energy future. The changing energy world is forcing companies to innovate in order to stay competitive. Through a rich variety of energy training courses and networking activities we prepare energy professionals for challenges they face in this dynamic environment. The energy community has come to appreciate EDI as a platform on which both partners and participants can exchange energy knowledge. In addition, the energy sector faces the possibility of a growing shortage of qualified personnel over the coming decades. The sector has only one choice: to invest in knowledge. EDI was founded in 2002 by Gasunie, Gastera, Gazprom and the University of Groningen, and was later joined by Enagás and Shell.
