

Intensive Programme LNG Industry

Discover the dynamics of the global LNG business – with site visit to Barcelona LNG terminal

8 - 10 June 2020

Barcelona, Spain

English

3 days

All levels

€ 2.950,-

Open market

Topics

- Major developments in the LNG industry
- How new energy sources (such as unconventional gas) and new LNG players are affecting the LNG business
- The role of small scale and break bulk LNG in the global gas market
- Global LNG trends in the context of (European) security of supply

About the programme

Several recognised experts with diverse backgrounds in business and academia take a deep dive into the highly dynamic world of LNG. They discuss all parts of the LNG value chain, from production to transport and end uses, from a variety of perspectives – legal, commercial, political and social.

The programme includes a visit to the LNG terminal in Barcelona and involves e-learning as well as a case study "How to produce and sell LNG in 2025".

Intensive Programme LNG Industry

Participants of the Intensive Programme LNG Industry will receive a certificate on behalf of Energy Delta Institute. This Programme will contribute to your continuing professional development.

Investment

€ 2.950,- (Accommodation costs and VAT excluded)

**ENERGY
DELTA
INSTITUTE**
Energy Business School

Energy Delta Institute (EDI) is an international energy business school. Our mission is to bring together world-class knowledge and business skills to educate and inspire energy professionals, so that they can become the new leaders of a sustainable energy future. The changing energy world is forcing companies to innovate in order to stay competitive. Through a rich variety of energy training courses and networking activities we prepare energy professionals for challenges they face in this dynamic environment. The energy community has come to appreciate EDI as a platform on which both partners and participants can exchange energy knowledge. In addition, the energy sector faces the possibility of a growing shortage of qualified personnel over the coming decades. The sector has only one choice: to invest in knowledge. EDI was founded in 2002 by Gasunie, Gastera, Gazprom and the University of Groningen, and was later joined by Enagás and Shell.
